

# Title

Software Engineering,  
Maersk Mc-Kinney Moller Institute,  
University of Southern Denmark

Nikolai Emil Damm\*

December 13th, 2023

## 1 Problem

- Security
  - Government hacked into Google, and took actions to make all infrastructure built inhouse
  - Encryption
  - Isolated containers
- Performance
  - Datahouse as one huge virtualized computer
  - Racks of CPU's
  - Racks of RAM
- Demand / Market Share
  - Google Cloud is growing fast
  - But Azure has most of the market in DK
- Availability
  - Global network
- Sustainability
  - Does a lot to rely only on renewable energy.

## 2 Methodology

## 3 Evaluation of Solution

## 4 Key Take Aways
